

## **ABOUT ARISTOCRATIC CONGRESS “ABAZA”**

All-Abkhazian Aristocratic Congress “Abaza” is an informal meeting, traditionally held by Aqua-Abaza in the framework of congress tourism. The participants are represented by the descendants of noble families, devotees and admirers of noble heritage.

Congress goals and objectives are simple: communication, exchange of opinions, and establishment of live human contact.

The congress adheres to the fundamental virtues, as a serving the motherland, preservation of cultural heritage and its development.

The forum does not replace the activities of aristocratic communities, is not a legal entity and does not try to become one.

Serious discussions and making specific decisions are not included in our objectives and goals.

The congress respects all forms of public activities, including the aristocratic one. Speeches, debates, minutes and reports are essential for the operation of any organization. For us, they are unacceptable.

We value the cultural and ethical heritage of past generations of the Abkhazian elite. Our deeds and words are understandable and clear not only in our nation’s environment, but to all mankind. Such values are in our spiritual heritage. It is the high spirituality and ethics that determine the style and content of our communication.

In our communication, we choose information exchange for the hall and friendly conversations for backstage communication.

The very name of our congress suggests its noble style.
